CENTRAL SERVICE UNIT (CSU)

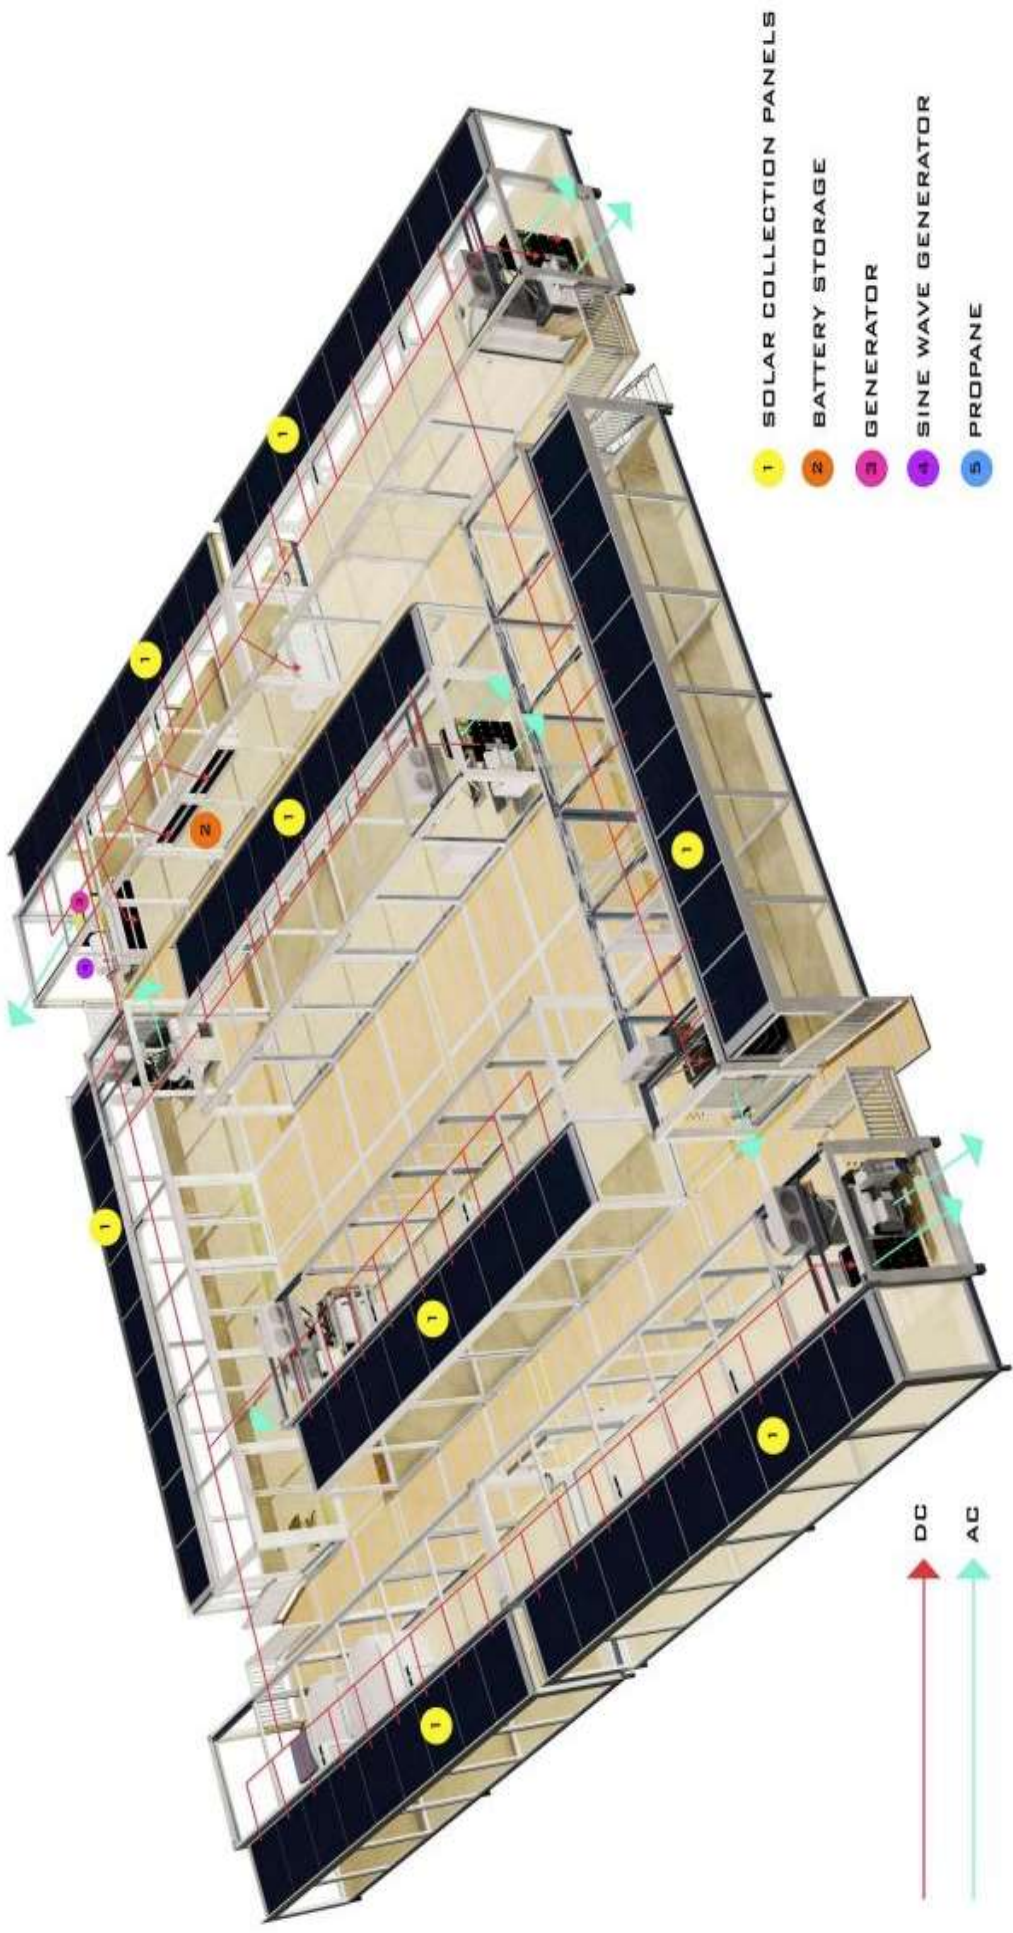

The CSU was designed for the military and FEMA. It has been repurposed for the Living Hub to provide self-contained power generation, water filtration, communications and security.

- Approximate size: 40' hi-cube ISO standard container
- Self leveling
- Several power sources
- 74,000 watts of power on the inverter and solar system along with a 12kw back-up diesel generator
- Optional state-of-the-art hydrogen fuel cell technology providing a further SKW of charge power for batteries
- Communication system for WIFI, Internet, phone, and cable
- All technology is remote monitored
